

PATRICK SHUSHEREBA

PROFESSIONAL PROFILE

Charismatic Full Stack Web Developer focused on modern technologies and challenging work. Over 2 years of experience in software development. Skilled in various web technologies as well as agile development methodology. Detail oriented with a research background. Excellent presentation, phone and digital communication skills.

EXPERIENCE

Developer II

Nexient – an NTT Data Company 4/2021 - Present

- Enabled a Fortune 500 retail client to realize \$31M in annualized incremental revenue as a developer on a six-person Scrum team by delivering A/B-tested features to seven domestic and five international websites in support of seven retail brands, composed of Vue.js micro-frontends with Node.js BFF as well as a legacy Java Spring-based monolith.
- Used the Container/Presentational design pattern to display customers' loyalty rewards balances in various areas of the ecommerce platform.
- Contributed to internal tooling for scaffolding unit tests to increase developer productivity and improve workflow.
- Redeveloped the email/SMS capture modal to include content from Adobe Experience Manager 6.5, resulting in a double digit increase in email conversion.

Independent Contract Developer

Stealth Startup 2/2021-4/2021

- Implemented PDF, CSV, and XLSX data export features on an application in the cryptocurrency space.
- Designed database schema for cryptocurrency transactions and generation of wallet addresses.

Assistant Paralegal I

Fragomen, Del Rey, Bernsen & Loewy LLP 2019-2020

- Analyzed case documents and prepare immigration applications for filing with the appropriate government agency.
- Drafted petitions, applications and specialized support letters detailing eligibility for visa classification and other immigration benefits.

Legal Processing Assistant II / Operations Project Support

San Bernardino County Superior Court 2016-2019

- Selected for a special project assignment to help the Civil division of the court transition to a new case management system.
- Developed training curriculum and materials to train staff on Odyssey, the court's case management system.
- Designed a system to track effectiveness of training and make improvements through an iterative process.
- Performed analysis of current business process to address deficiencies and advise court management on necessary changes.
- Worked on the development of the court's Civil Procedures Manual, to be used by all of the court's Civil clerks.
